

Vardan Verdiyan, PhD

Quantitative Analyst
Fidelity Investments

Vardan Verdiyan is a quantitative analyst in the Quantitative Research and Investments division at Fidelity Investments. Fidelity Investments is a leading provider of investment management, retirement planning, portfolio guidance, brokerage, benefits outsourcing, and other financial products and services to institutions, financial intermediaries, and individuals. QRI supports our investors with timely and actionable insights, manages systematic products and solutions, and enables scale through adoption of common platforms.

In this role, Vardan is responsible for working closely with the Target Date portfolio management team and is responsible for conducting strategic and active asset allocation research to improve the investment process. Additionally, he provides quantitative research and analysis to support investment decision-making, including portfolio construction and risk management. Vardan works on the Multi-Asset Class Quantitative Research team.

Prior to assuming his current role, Vardan was a quantitative analyst at Strategic Advisers LLC, where he worked closely with Strategic Advisers' research and investment teams to further enhance the firm's modeling capabilities across alpha and risk space. Vardan has been in the financial industry since joining Fidelity in 2017.

Vardan earned his Bachelor of Science from Jacobs University in Bremen, Germany and his PhD from Cornell University.
